

It's Here! Organic cotton and bamboo-silk blend mattress sets!

As we become more aware of ways to protect the environment, whether through recycling our soda bottles and cans or choosing to use reusable grocery bags, we are ensuring the health of the planet for ourselves, our children and future generations.

Providing home furnishings which are produced in an environmentally responsible, and ecologically friendly way is our commitment to do our part.

Therefore, we invite you to join us every other month as we introduce you to fashionable and 'green' products for your home.

This month we'd like to highlight some of our 'green sleep systems'. For what better way to make a difference than to begin at home with an excellent night's sleep on a bed noted for its superior comfort and gentle environmental footprint?

Let us introduce the new Vera Wang collection by Serta, featuring our first certified organic cotton topper. Among our other 'green sleep systems' is the AlluraBed by TempurPedic, featuring a natural bamboo/silk blend topper.

Come in and discuss your sleep needs with an experienced mattress specialist. A good night's sleep is priceless...

For additional information on our 'green' sleep systems please contact the sales@noplacelikeit.com or call a mattress specialist at 541-967-8259.

Vera Wang by Serta

- Resilient and durable
- Naturally comfortable
- Extremely luxurious
- Wicks away moisture and creates a cooler sleeping surface

Serta Latex

- Proper spinal alignment & support
- Anti-microbial
- Environmentally friendly

Tempu-Pedic Beds

Tempur-Pedic has added a number of environmentally friendly features to their line up of luxury beds. Most notable is their move to use sustainable materials while providing their customary high-end luxury.

Side panels of the mattresses and box springs are made of breathable MicroSuede (an environmentally friendly alternative to genuine hide). The top pillows are silk/bamboo blends or organic cotton.

Come in and see and feel the luxury of a Tempur-Pedic bed today.

Please send us your suggestions for 'green' topics to explore to athomefamily@noplacelikeit.com.
